Crow In Concert

All School Mixer Scheduled Oct. 2

The Crow will perform immediately following the all school mixer. They are presently on the national front and are best known for their hit "Evil Woman."

Holds Dedication

PACE Incorporated

Cutting the ribbon at the grand opening of PACE are from left to right: Ed Owsley, Rev. Carl Roberts, Ron Daues, Steve Petty, Murray Renick, Mayor Logan, Gary Broyles, Dennis Chapman, Fred Ackelmire, Russ Perry, Dave Beshou.

There's a new organization here in Rolla who spotted an unwanted situation, analyzed it and has developed a solution to solve the problem.

The organization's name is P.A.C.E. The problem is that which confronts approximately 20 percent of the graduates from UMR. That being their inability to locate a satisfactory position in their chosen field.

In an interview Friday morning, Dennis D. Chapman, vice president and director of marketing had this to say. "A graduating student's ability to secure a good position in a top-flight company today depends upon more than just being exposed to a limited number of interviewers on campus.

Because the job market is extremely dull now due to tight money and governmental cutbacks in spending especially in those areas where massive engineering staffs were required before, today's graduate is really facing a double jeopardy."

Mr. Chapman, himself a recent graduate student at UMR., went on to explain that "...with corporate manpower cutbacks, many highly-trained, well-educated engineers and support personnel are out of work and competing for a reduced number of job openings. When the recent college graduate starts looking for a well-paying, challenging position, he's being confronted

perhaps for the first time with the real fact that his may be a very difficult business life."

"The only way these young graduate can compete on an equal basis with the older, more-experienced engineer, is to market their wants and capabilities in an extremely professional way. Reaching out and contacting more corporations ... telling them about themselves ... what their goals and personal objectives are."

"I've been talking about engineering students simply because this is our major area of concern here in Rolla ... but the same conditions hold true in all other educational areas, too."

(Continued on Page 2)

The all school Mixer will be held October 2. This first all school Mixer promises to be one of the best with the Crow highlighting the weekend with a concert Saturday night.

Activities will start with the arrival of the girls Saturday about noon. Girls from UMR, Cottey, Fontbonne, Stevens, Monticello, Linenwood, Dorms, and several Nursing Schools of the area have received invitations to attend this year's Mixer. However, as of last Friday, only ONE school has confirmed that they will be here.

The first Mixer will be held in the ballroom of the Student Union Building from 1 till 5. This Mixer will feature as it's

band. The Comic Book Society. Immediately following this Mixer will be the crow concert.

The concert performed by the Crow will be from 6:30 til 8:30. There will be no reserved seats so bring your favorite blanket to groove on during the concert. Tickets will be \$1.50 each with a valid I.D. - two tickets per I.D. Tickets will be offered at \$3.00 each for those wishing to attend but not a date or student.

After the Crow concert another Mixer will be held in the Student Union Ballroom. This dance will start at 9 and will go until 1. The Common Ground will perform at this Mixer.

Don't forget to come to the Mixers and concert-Let the October 2 Mixer be the best in UMR's history.

Schedule Of Events

Saturday, October 2, 1971

1 til 5 Mixer-Student Union-Comic Book Society.

2 til 4 Football game- UMR vs. Culver-Stockten

6:30 til 8:30 Crow Concert- Multi-Purpose Building

9 til 1 Mixer- Student Union- Common Ground

"Marijuana, Are We Going To Pot???"

Dr. Joel Fort will lecture on marijuana Tuesday, October 5 at 7:30 p.m. in the S.U. Ballroom.

Dr. Joel Fort is a physician-author specializing in public health, drug abuse, youth problems, and social reform. Founder of the center for Solving Social and Health Problems in San Francisco, he has provided comprehensive outpatient treatment for anyone with drug (alcohol, tobacco, pills, narcotics, LSD, etc.); sex; suicide, crime, overweight; sleep; and other special problems. He is continuing the work for the center he developed in 1965 which was the

first youth and "hippie" (free) clinic and the first in the country to provide special services to the poor minority groups.

Pleasure Seekers: The Drug Crisis, Youth, and Society, and also of numerous lectures given on college campuses such as: "The M.A.D. (Mind Altering Drugs) World;" "Marijuana, Are We Going To Pot?"; and "Sex In America."

FLICK

The Impossible Years

Movie Times: 4:00 and 6:30.

Life is full for university professor David Niven collaborating on a book with colleague Chad Evevett about teen-age behavior. He points with pride of his 17 and 15 year-old daughters until the older is arrested for carrying a dirty word sign in a protest march. When he sees it like it really is, his discomfort increases but he presumes that her playing hockey, sloppy appearance, bad grades and non-ending giddy phone calls are due to the influence of her trumpet-playing

boyfriend. Niven suggests she play the field, and she quickly fills the house with incessant parties, screaming teens, and undulating rock-n-roll groups. To relax his nerves-and to finish his book-he sends her to Catalina for a weekend from which she returns no longer a virgin.

Billiards Tournament

The Student Union will sponsor a Billiards Tournament Tuesday, Oct. 5 at 7:00 p.m. The sign-up list will be on the S.U. bulletin board. All you hustlers sign up now.

Rap Session

There will be a Rap session with Dr. Foel Fort from 9:00 to

P.A.C.E. Incorporated

Chapman believes the average student is not ready for the shock of not being able to find an immediate position for his graduate abilities. After the complete their education, he believes most students are under the impression that nearly any company will hire them simply because of their degree. "Nothing could be farther from the truth" says Chapman. "It's an employers market today ... not an employees or job seekers market." This was the reply he received.

"P.A.C.E. is the shortened name for the PROFESSIONAL ASSOCIATES for CAREER ENHANCEMENT. On the surface, P.A.C.E. would appear to be an employment agency or a placement bureau. But this isn't the case. P.A.C.E. does not locate a job for its clients and then try to convince the graduate to take it to collect a fee. There are too many organizations who do that today. They're happy because they make money. But the graduate they place may not be so happy, simply because they were over sold on the company or their opportunity within the company.

P.A.C.E. is actually a group of Rolla businessmen and educators who have pledged themselves to helping interested students first; determine what it is they really want to do; second, help them decide where their real capabilities lie; third, showing them how to become the dominant factor in negotiations for each position they're offered and finally; guiding and directing them in the selection of the one which offers the graduate the best immediate opportunity combined with the brightest future."

"We spend hours with each student during the last year of

their college days making them think about themselves, what they want to accomplish in life, motivating them toward these goals. We have sessions where we do roll playing...actually showing them how to conduct themselves in job interviewing situations. Then when we think they are ready ... we actually have a few try runs staged for their benefit with the type people they're going to be meeting in actual interview situations. We get the feed back from these professional people and then discuss the students performance in these situations with them privately."

"All this builds confidence in the student. But we don't stop there ... not by any stretch of the imagination. We help the student prepare a professional resume, a telling them to write for a complete resume, photo and all these things. The things a real pro who has been out in the business world for a few years and who is looking for a job would do."

Perhaps the most important thing P.A.C.E. helps the student accomplish is to isolate those companies which fill his "ideal position" characteristics. Once all this has been accomplished, the student can go out and talk with those companies which ifit him best on equal terms with any other applicant."

Mr. Chapman says, "Sure, we charge a fee for our services but the difference between the starting salary of one of our people and any other student

11:00 a.m. in the Student Union Ballroom. He will be open to questions from his lecture "Marijuana, Are We Going To Pot?"

Don't miss this opportunity to talk to one of the leading authorities on today's drug problems.

Association Of Married Students Holds Meeting

The Association of Married Students held it's monthly meeting on Monday night, September 20 in the Student Union with over 80 people present. It was a pleasure to have many new people present.

President Jack Oldrin presided and the business meeting proceeded smoothly. Fund raising projects were discussed and it was decided that the Mates will sponsor a fund raising project for charity this semester. A committee will look into choosing a charity.

The next social event will a Halloween-Square Dance Party to be held October 30, 1971 in the Engineer's Eating Club at 8:00 p.m. All married couples will be invited. Further details will be presented at the next Mates meeting on Oct. 12, 7:30 p.m. in the Student Union.

A bowling lane has been reserved for the Mates club on Thursday evenings, 7:00 at ABC Bowling Lanes. Any married couple wishing to bowl is welcome to come join the fun.

After the business portion of the meeting was adjourned, Fred Pope entertained with his guitar.

If you wish to order a Mates sweatshirt, call Jo-Ann Oldrin, 364-2633 to place your order.

fresh off the campus who's lucky enough to have a job when he graduates, more than pays the fee. It's an investment in a career just as a college degree is an investment in an education. The best college education in the world, won't really solve today's problem. Unless a graduate is poised, confident, motivated and known, he's at the mercy of the limited number of employers who have job openings."

And too, since many new graduates find the need for post-graduate career consultaion. Pace offers its clients a five year extended career enhancement program. Free of charge. This means that each client has at his disposal the entire PACE team for a full five years.

GIVE A DAMN. USE A CONDOM.

Take the worry out of sex, and you'll enjoy it even more!

Making love is great. And if you really give a damn about both your lives...you'll want to protect her against accidental pregnancy. By using a man's contraceptive that's been designed not only with protection in mind, but with pleasure as well. For today's new condoms are exquisitely sensitive, while still providing the same dependable protection the condom has always been noted for!

And now many of the best brands of condoms are available by mail from Population Planning Associates...and delivered to you in a plain package to protect your privacy.

Choose from the Fetherlite from England, thinnest and most exciting to use, with "Sensitol" lubrication for extra enjoyment. Or the NuForm, also from England, pre-shaped for a unique new sensation. Or the famous Trojan. Or the well-known and popular Sultan. And many more. All electronically tested and made to exacting FDA standards.

Fast Delivery—Money-Back Guarantee

Discover our fast, low-cost service by sending just \$4 for a sampler pack of 13 assorted condoms—5 different brands, including the sensational Naturalamb, made from natural animal membrane—plus an illustrated brochure describing our complete selection. Or send just \$1 and get 3 English brands: 2 Fetherlites and 1 NuForm, plus the brochure. For brochure alone, send only 25¢. All orders are filled the same day received and sent in a plain package. Money back if not delighted. Mail coupon now.

Population Planning Associates, 105 North Columbia, Chapel Hill, N.C. 27514

Please rush me in plain package:

☐ Sampler pack of 13 assorted condoms plus illustrated brochure describing complete selection, \$4.

☐ 2 Fetherlites, 1 NuForm plus brochure, \$1.

☐ Illustrated brochure only, 25¢.

I enclose payment in full. If not delighted, I may return unused portion of order for full refund.

John Kremer Presides In National IK Meeting

Joe Kremer

Jon Kremer, serving as Royal King of the Intercollegiate Knights National Honorary Service Fraternity, has just

returned from attending a National Executive Council meeting in Edinburg, Texas. Kremer is the equivalent of national president and was in charge of the meeting. This was perhaps the most important meeting of the national officers in that policies for the year were set into action.

Osage Chapter of the Intercollegiate Knights here at Rolla, where Kremer had served two terms as president before becoming Royal King, was Outstanding Chapter last year and much was mentioned at the meeting concerning the succession of Osage.

New Sales Tax To Affect Students

In accordance with a new state law, the University of Missouri tomorrow will begin paying the three per cent state sales tax on retail sales made by it. The amendment of the state sales tax law in 1965 changed the sales tax from a tax on the buyer to a gross receipts tax on the seller, which in this case, is the University. The law, however, provides that the tax may be collected from buyers for remittance to the state.

The new law, Senate Bill 72, repeals that portion of the state sales tax statute which previously exempted public higher education institutions from paying the state tax on its retail sales. The new legislation was passed by the last session of the General Assembly and became effective at midnight September 27, 1971.

Among the items on which the University will collect the state sales tax are student union and snack bar food sales, athletic tickets, concessions, programs, bookstore sales, publications, certain agricultural sales,

concert tickets, tickets for student activity events, books sold by the University of Missouri Press and such services as printing, copying, duplicating of tapes and others.

While the University wants to be a good corporate citizen, and recognizes the great need of the cities which have enacted city sales tax ordinances, the University does not believe that such city ordinances, the University does not believe that such city ordinances can legally impose a tax on the gross receipts of sales made by the state university. Therefore, the University does not believe it can legally collect such city sales tax from buyers for remittance to the state and it will not do so.

In addition, the University announced it has determined that room and board charges for students living in University housing are not subject to state sales tax.

Under the new legislation, the University still is exempt from paying the state sales tax on purchases it makes.

Cantrell To Visit UMR

Each year the Missouri House of Representatives Appropriations Committee visits the various state agencies supported by appropriations from the General Assembly. This committee, as well as any

other representative who wishes to participate, will be visiting the University of Missouri-Rolla campus Tuesday October 5.

E. J. "Lucky" Cantrell, chairman of the appropriations committee, and his fellow committeemen will arrive at UMR at 10:30 Tuesday morning. Chancellor Baker will greet the group with welcoming remarks at the Civil Engineering Auditorium.

Following this the committeemen will meet with several UMR students, on a one to one basis, to visit with them, tour the campus, and to have lunch with them wherever the students normally have their lunch.

At 1 p.m. the legislators will meet faculty guides, again on a one to one basis, who will also show them around campus, discuss various activities, introduce other faculty, and visit some classrooms in session. At 2:20 p.m. the group will reassemble in the Mechanical Engineering Auditorium for a question and answer session, followed by a press conference.

A Missouri Miner Interview

Zane White — Champion Of Justice?

By Dwight Deardeuff
And Sidney Birchfield

This article is the first in a series of articles to be published on community relations. It is the goal of the Miner Ness Staff to interview prominent local leaders and to discover if the average Miner's persecution complex has a basis in fact. Wity this in mind, Mr. White was interviewed last Tuesday, September 21, one day prior to his appearance on KMSM.

Motivated By Pride And Accomplishment

Mr. White has been prosecuting attorney for four years now. His goal when he assumed office was to be the best prosecutor that Phelps county had ever had. Prosecuting Attorney White speaks of himself as "a man motivated by pride and accomplishment." With the enviable record of only three jury trial losses during his four and one-half years of office, one might say that he takes his office quite seriously. He believes that law enforcement officials must be fearless and attributes Rolla's lack of riots and civil disturbances as "due in part to strict law enforcement and by deterring potential leaders from acts of violence." Mr. White sees his

life as that of a priest for accomplishment and as a contribution toward maintaining an orderly existence. He wants to see Phelps County as a place where "parents can send their children to school with peace of mind."

More Reliable Relationship

Mr. White feels today that there is a better and more realistic working relationship between the university and the law. He claims that before he took office, the university and its professors were treated as a privileged class. The policy prior to his administration was to refrain from "ruffling the water," but this was an unrealistic attitude to have a "vacuum of 6000-7000 people from the law." His first crack-down was on Miner's drinking in public during the St. Pat's Day parade. This, according to Mr. White, was a source of bitter feelings from the townspeople who would have been fined for such actions. He then boasted of the time he was police magistrate, and having groups of six to eight Miners brought before him for celebrating at the parade. I must confess, however, that during the five St. Pat's parades I have "enjoyed", that I have failed to see anyone taken into custody for drinking.

Bail Bonds

The interviewers then hit upon some of the bail bonds handed out by this county. Mr. White was constantly correcting himself for using "we" in speaking of the setting of the bonds, because more appropriately Judge Bradford sets the bonds. He defended the bonds for recent possession of marijuana, which is a passive crime, by comparing them with the bonds set for crimes of violence, such as rape. White then mentioned several avenues open to a defendant to have this bond lowered-higher courts, circuit court of appeals and a writ of habeas corpus.

Playboy Not Authentic Source.

When asked his opinion of the widespread use of marijuana, Mr. White asked where our information on widespread usage was obtained. We quoted Playboy's recent college poll, only to find out that "Playboy is not an authentic source of information." He also mentioned that it is the juries that set the penalties for law breakers.

Revolutionaries

On UMR Campus

Then Mr. White dropped his big bomb. There are "revolutionaries on our campus." (Continued on Page 4)

More News & Views

UNIVERSITY OF MISSOURI - ROLLA

WEDNESDAY, SEPTEMBER 29, 1971

Joe Morello Performs At Half-Time

During the Miner's home football game the UMR Band presented it's first show. The show consisted of a pre-game and a half-time performance.

The pre-game will remain the same throughout the entire season. The Band, flags, and Pershing Rifles will join together for the presentation of the National Anthem. Immediately following, the band will form a "Floating" UMR

shown to both sides of the field while playing "Fight Miners".

The Half-time show for this game was highlighted by the performance of Joe Morello. Mr. Morello, who was voted the number 1 jazz drummer by Playboy Magazine played during the half-time backed by music played by the Marching Miners, the band and Mr. Morello played three numbers: Follow the BOUNCING Band, Modal Jo, and Gregory's Chant.

These songs had never been played before a public audience and it was indeed an honor bestowed up on the UMR Band to play for the first time music written especially for Mr. Morello.

Half time performances will vary throughout the season. At the next home game two fine high school bands will be featured; Pacific and Marshfield.

EDITORIAL OPINION

Zane White Interview

(Continued from Page 3)

pus. "I have to wait to get the numbers through people who will talk to me." When asked to define the nature of his revolutionaries he said "revolutionaries to overthrow the government of the United States." We asked Mr. White if our shipment of SDS revolutionaries ever came through from Berkeley. To which he replied that he didn't feel "that everyone in the SDS is revolutionary." This seemed pretty absurd coming from a self-appointed political historian. "The revolutionaries we have here are members of the United States type Liberation Front. They are equivalent to the Viet Cong.

Their present aim is to be a drag on the economy; they refuse to work, increase unemployment, spread dope,

encourage free love, and communal life. They have a peaceable approach now, later on they will come to the violent state." Our revolutionaries are trained by the "brown berets" in old Mexico in a camp with their own lawyer, doctor and dentist.

I was really worried at this point with these creeps and their "Castro handshakes," which for all you unhip brothers is a friendship handshake, but Mr. White assured me that no revolutionary activity was planned on our campus for the next two semesters.

This, however, didn't preclude the revolutionaries from traveling to St. Louis with their drugs and inciting the blacks into possible confrontations with the police. He went on to state that, "the drugs that they were going to give to the blacks were like those used in mental hospitals."

Though many readers of this column may feel that Zane White is "commie huntin'" in the style of Joe McCarthy of old, he purports to have evidence to back up his claims. He sees no real problems out of the ordinary between the students and the town of Rolla. It must also be pointed out that he "would rather talk to the students than send them to the penitentiary."

NOTE: This article is an editorial interpretation of the interview conducted with Mr. Zane White-Phelps County Prosecuting Attorney, because a tape recorder was not permitted to record the interview. All quotes have been cleared by Mr. White and boldfaced.

Letters To The Editor

Mr. Roger Ellis
Editor, Missouri Miner

Dear Roger,

We as two students who have recently completed classes with Professor Frank Capek would like to offer something with respect to the controversy raised by you and the Good Seed.

First, to corroborate the statements of Dr. Senne: Frank Capek is a knowledgeable person, and a communication problem does exist between Professor Capek and his students. We feel the responsibility for the breakdown of communication rests not with Professor Capek, but with his students. Professor Capek is a shy and reticent person, and the traditional hostility directed toward him has only intensified his reluctance to expose himself to his students. This is to their distinct disadvantage.

Professor Capek has a fund of practical knowledge and experience waiting to be tapped by his students. They have the opportunity to learn from one who has directed civil engineering works of all types and magnitudes. To those who cherish knowledge of this form, difficulties in communication should be easily surmounted.

Our experience has shown that he responds well to individuals, but less so to groups of indifferent, hostile, and often belligerent students. Therefore, the solution to the difficulty lies not in further criticism of

Professor Capek, but in a greater understanding among his students of his personal characteristics and limitations. In our opinion, those who would consider themselves professionals must be tolerant toward others. As Civil Engineers-to-be, Professor Capek's students are not exempt from this professional responsibility.

We hope that the issue of the quality of Professor Capek's instruction can be resolved in his classroom by him and his students, and that further deleterious public discussion may be discontinued.

Yours very truly,
David N. Torgeson
David R. Wright

Dear Roger,

In our country, which is entering a period of identifying and solving domestic problems, it is saddening to learn of a minority of people which has not only been discriminated against but also hidden from or ignored by the public. This group is the mentally retarded.

This treatment has been the result of myths which surround the retarded, but the facts suggest more constructive means of dealing with them. There are no boundaries against mental retardation. It strikes victims of all ages, races, locales, and sexes. Approximately six million

Americans are personally affected by; mental retardation.

There are at least 200 diseases that, unless treated early, can produce retardation. This is especially true of viral diseases which can easily induce encephalitis. The majority of the retarded can be educated or

trained to occupy jobs which are fulfilling and dignified. Not only does vocational training act as therapy for the retarded, but also benefits society by increasing the number of qualified, skilled workers and by reducing the costs of caring for the retarded.

But what can a college student carrying 17 hours per semester and holding down a full time job during the summer do to improve the position of the mentally retarded? A lot if he joins YARC (Youth Association for the Retarded Children) and

volunteers at least five hours per year working with retarded children. The volunteer work varies from such activities as reading aloud to the children, playing games with them, to helping in the vocational workshops. To join YARC one must be between the ages of 13 and 25 and have a desire to help.

If any students would like to help in this most worthy cause, please call Rick Whitten at 3644037. Your help would be most appreciated.

Sincerely,
Darrell Prior

OUR MAN HOPPE

Can Thieu Lick Nobody?

In Sigon, President Thieu has now agreed to step down if he receives less than half the vote in the upcoming elections.

Thieu's concession was seen as a victory for U.S. diplomats who have striven mightily in recent weeks to inject some "suspense and drama" into the campaign - in order to convince the world democracy flourishes in South Vietnam.

The following short-wave broadcast, monitored here, would thus surprise no one. It was believed transmitted by the American Embassy in Saigon.

Sigon - With the Presidential elections less than two weeks away, excitement here is mounting to a fever pitch. Nobody is, of course, running against President Thieu. Experts are predicting an extremely close race.

Thousands turned out today for the gala opening of the newly-erected "Nobody for President" Headquarters of Whar Dhat street. (cq) It was a scene of frenzied enthusiasm as Nobody's partisans cheered for their candidate.

"Who will end corruption?"

cried Nobody's top strategist, What Pho, (cq) from the bunting-bedecked rostrum.

"Nobody!" shouted the crowd.

"Who will lick the enemy?" yelled What Pho.

"Nobody!" roared the crowd with growing fervor.

"And who will bring us peace and prosperity?"

And, oh, how the name of the challenger echoed to the heavens!

Nobody, as is customary, made a brief speech. Nobody said it would be an honest election. Nobody said President Thieu would put the good of the country ahead of his own self interest.

This evidence of Nobody!," "Nobody's for me!," and "Nobody will be a great leader!"

A group of plump middle-aged matrons, know as "Nobody's Sweethearts," then sang the theme song, "Nobody's Ruvs (cq) Me" and the throng went wild. Observers agreed that the campaign thus far had captured the mood of the electorate.

At a press conference afterward, the candidate's manager, Dat Sma Boi, (cq) generally referred to as "the brains behind Nobody," flatly denied the campaign was being financed by the U.S. Embassy in a last-ditch effort to give the election validity.

"Nobody denies it!" he said flatly.

U.S. officials, meanwhile, said they were "highly pleased" by President Thieu's democratic move in allowing Nobody to run against him.

Moreover, they said, Thieu had conferred complete freedom of speech on his opponent. "Nobody can criticize," they quoted him as promising, "and get away with it."

Thieu's confidence apparently stemmed from the old political adage: "You can't beat somebody with Nobody."

But as an Embassy official privately told the press here the other day: "This looks like one election Nobody can win."

Give A Damn!

By Sidney Birchfield

Rolla - 1984?

Violence continued for the fourth consecutive day as outbreaks of shooting and fighting between police and students raised its toll to thirteen dead and thirty-six wounded. Negotiations between University officials, the local police, campus police and student leaders continued unsuccessfully as the local police refused the student demands despite appeals from government officials.

The fugitive students with headquarters established in Parker Hall, released what they termed the Seven Points. Listed in their demands were: 1) Student leader Jeff Carlyle be released from custody stemming from a marijuana bust 2) A marijuana bust fund be established with a student controlled board to post bond for students arrested for possession 3) The resignation of the prosecuting attorney and magistrate for incompetence

and for blatant violation of constitutional right 4) A federal investigation into the Phelps county judicial and penal system be conducted 5) That students have a voice in the learning of the university 6) That the representatives of the Board of Curators have student backing (appointment ratified by student bodies of the four campuses 7) The resignation of the chief of campus police.

This gross undertaking has been blown to proportions beyond belief. One week ago it

began with severe students protesting before the chancellor's house and before the Phelps county courthouse after the arrest of Student Body President Jeff Carylyne. Campus and local police sought to disrupt the protesting, but when they met opposition, they called in the tear gas. Students

retalized with catcalls and obscenities when suddenly shots rang out and two students fell mortally wounded. Students, angered and shocked, then stormed Parker Hall where they seized the Dean of Faculties and Personnel as hostages.

When questioned, police authorities said that the protestors were known revolutionaries and that they had planned on dynamiting the courthouse. Of course preventive measures were to be taken to insure the protection of the communities civil rights. When further questioned, it was brought to light that they were tipped off by a very prominent and reliable source that these revolutionaries, trained in Mexico by Castroities, were also planning to dump LDS into the public water works. The name of the informant was not revealed so as to protect himself and his family.

As of this release, police are now contemplating the storming of the Parker Hall with loaded weapons if the fugitives do not surrender. Alas, Babylon...alas, Attica.

Signs Of The Times . . .

BIG MAN ON CAMPUS

Think About It

By Patrick Michaels

Just for once put away your books and sliderules and sit back and contemplate. Think about anything you wish and ask yourself this question. What am I doing here in Rolla? You probably cannot come up with an immediate answer, but don't be alarmed. You see very few of us really understand why we are here.

Now think back to your groovy high school days. Great weren't they? The girls, the parties, and for many of us, good report cards; ah yes, those were the days. The days when money never seemed to be the problem it usually is here. And think about how little you used to study for those high school A's. Remember how easy it was to get a date for homecoming. The girls used to beg to get asked. The odds were all for you back in high school, weren't they? Ah, but the times they are changing.

Time to jump back to reality. You can now start thinking about Rolla. Think about a thriving metropolis of 11,132, (1960 census), situated in the north central portion of the Ozark Highlands, 100 miles southwest of St. Louis, 200 miles southeast of Kansas City, home

of Bow Wow Dog food and the University of Missouri at Rolla, just think about it and what immediately comes to your mind? A great engineering school? No! Beer busts? No! Books? No! St. Pat's party weekend? No, but your getting closer! Cozy Art's? Warmer, warmer! Girls?! Right on!! Why think about girls? Answer: Because down here you can't do much else with them. And so you sit and think about girls for most of your time down here and what good does it do you? What good does it do you to think about grades and money? What good does it do you to be in Rolla? The answer to the preceding questions was probably the same wasn't it? Oh well you can't win them all or so they say but why can't you win at least some of them.

NOTICE

The Wesley program will be Wednesday, September 29, with Mr. Prakash U. Bakhru, speaking on India at 6 p.m. at the Wesley House, 403 West Eighth Street.

Dear Balthazar

Dear Balthazar,

Alright I've had it! Just the other day I pursued a criminal into one of the outlying areas and got busted for improper display of the American flag. I don't get it. All patriotic cops have flags sewn on their shoulders.

A Patriotic Cop in K. C.

Dear Cop,

One of the counties in the Kansas City vicinity has recently passed a law which makes it a violation to display the American flag as part of your clothing. However, I understand that it is still legal to have your tattered flag flapping from your radio antenna.

Dear Balthazar,

I understand that there is to be a Rap Session on September 28 at 3:30 p.m. in the Student Union Ballroom. What is this?

Meryle Baker

Dear Meryle,

These Rap Sessions are held throughout the year by the Student Union Board. They give all of the students a chance to ask questions or voice grievances directly to administrators and faculty. If you have a question, why not come and ask the Chancellor.

Dear Bal,

Is it true that Professor Frank Tippitt was a contributor to

"The Greening of America"?
Bewildered

Dear Bewildered,

NO!

Dear Balthazar,

I have been reading your column for the past three weeks and I just can't get over the cleaver letters written to you. But your answers are even better. Your column has really got soul!

Rufus Bubba

Dear Bubba,

Thanks, but the two have more sole than soul!

Dear Bal,

I just thought that I would drop you a line and let your readers know that I have decided not to run for the governorship of Missouri. It was with a heavy heart that I had to make this decision.

Richard Ikorord

Dear Dick,

What a relief!

Dear Bal,

What's the scoop on Vic Cusamano?

Outstanding Teacher
Boosters Club of UMR

Dear O.T.B.C.U.,

Read What's the Scoop in this paper.

Dear Bal,

I heard that some dude is going to put a motion up in the State legislature that will outlaw the sale of "papers" in Missouri. What's up?

Herbert Ead

Dear Ead,

I have heard the same rumor. I guess everyone will have to roll their own using the daily rag. OOPS. Better use a better grade such as the "MINER" or you may get lung cancer.

Dear Balthazar,

What were the results of the KMSM Turtles Urinalysis?

Zane Grey

Dear Z. G.,

I understand that Beta Sigs' Jack Hoff really got hit by the KMSM Turtle.

Dear Bal,

What is a frat rat?

Gerald Dennis
Dear GDI, Ibbs

A large species of the mouse family which sometimes inhabits the commissary of fraternity residences.

What's The Scoop?

By Charles Laderoute

The Cusumano Case

This past Spring there was much attention aroused by the actions between the UMR administration and Mr. Vic Cusumano. As school came to a close, the issues involved didn't.

This column will be devoted to the Cusumano issue in the coming weeks, with this weeks article highlighting the development of the problem and what has taken place up to the beginning of school this fall.

Mr. Vic Cusumano received his B.S. in 1964 and his M.S. in 1967; both from UMR. In the past 5 years he has received the Outstanding Teacher of the Year Award for 4 of those years. He has also been acclaimed Advisor of the Year this past school year for his efforts with Tau Beta Pi.

It would appear that Mr. Cusumano has the definite qualities of a good college teacher (at least his students think so); facts which are lacking these days by many instructors. Student opinion may not be the best indication of a good teacher, but as noted by Vice-Presidents (University of Missouri system) Unklesbay and Nagel at Columbia on April 8, 1971, evaluation of faculty members should "involve student opinion as well as judgement of their peers and administrators." Nuff said.

The practice of the university has been to give a new faulty member a seven year probationary period as an instructor. At the end of this time the person is generally promoted to Assistant Professor on a continuous appointment. However, he may be retained as an instructor on a continuous basis or may be given a terminal contract if his work does not show the proper merit.

During his probationary period, Mr. Cusumano has completed his M.S. and has also contributed to a major portion of his doctorate degree. So, what is the problem? The problem is many-faced and sometimes looks like lip service. Under present policies the administration is not promoting and faculty member who has not acquired a doctorate. (A few exceptions have been made as one may note by looking in the back of a UMR General Catalog under the list of Faculty and Administration, noting dates that persons were promoted to their present position and degrees they gave.) Also under the present policies, a faculty member can not get a leave of absence unless he has tenure; which a faculty member may not get unless he is on a con-

tinuous basis. Thus, for Mr. Cusumano to get Doctorate, he would need a leave of absence (since the Doctorate in Engineering Mechanics is not given at UMR). But to get a leave of absence he needs Tenure and to get Tenure he has to have a Doctorate! Sounds preposorous? It's true.

Given Choice.

And so, on March 31, Mr. Cusumano was given the choice of receiving a terminal appointment or taking the alternative of teaching at a drop in salary and only teaching ¾ time. In Mr. Cusumano's none-response to Dean Johnson's offer the previous alternative was given in a letter dated April 14, 1971. This is the present position of Mr. Cusumano; a terminal appointment which ends after the summer session of 1972.

A number of interesting points have not as yet been brought out. First, the policy of the university is to not allow a faculty member to be promoted to a continuous basis position unless he has earned his doctorate because in the past it often times lead to a complacent attitude by the person given the Tenure. Dean Johnson has stated that "if waived tenure, we have frequently found that the individual does not go ahead and complete work necessary to make him potentially the best individual for the job in the future." It seems that with 27 hours toward his doctorate and an earnest interest in students, Mr. Cusumano is actively showing his good faith toward making himself one of the "best individuals for the job."

Another point to emphasize is that Mr. Cusumano desires a continuous appointment so that he may start accumulating Tenure. As noted before a leave of absence can not be granted unless one has Tenure. If Mr. Cusumano was allowed a leave of absence he would complete his doctorate in order to meet the policies of the university.

What Mr. Cusumano desire is an appointment on a continuous basis as an instructor (not Assistant Professor) so that he may gain the right of a leave of absence. However, the policies seem to be piled against him for one reason or another (It seems doubtful that it could be his ability to teach).

STUDENT SUPPORT

Though Mr. Cusumano seems to have the ability to teach effectively, as shown by his reception of the Teacher of the Year Award 4 times, students

also showed their support for him in another way this past spring. During May a number of students started passing around a petition to be signed by those who were in favor of retaining Mr. Cusumano as an instructor. The results were that over 1,700 students signed the statement in favor of him. (It seems doubtful that any other faculty member at UMR could receive the backing of one-third of the student body.) The petitions were presented to Assistant Dean of Engineering Atchley who passed them on to Chancellor Baker. The results of the student opinion proved to no avail. Perhaps there is a bit of lip service by the University of Missouri administrators in reference to student input in faculty evaluation!

It is also interesting to note that in the booklet of the MSM Alumni Association meeting of May 22, 1971, the place where the Faculty Awards were handed out, the recipients of the Outstanding Teacher of the Year Award were listed on the last page. The previous page listed those who had been awarded Honorary and Professional degrees. It seems that good teaching ranks last with the alumni association.

Though all this may seem absurd a final note is in order. Even if Mr. Cusumano was given a continuous basis position and gained Tenure and was given a leave of absence and got his doctorate, there is still no guarantee that he would be allowed to come back and resume his teaching a UMR!

More next week.

NOTE: For those who would like to read all of the articles that I have taken excerpts from check past issues of the Missouri Miner: April 21, 1971; May 5, 1971; May 12, 1971.

Watch For The New Look Of The

Missouri Miner

Next Week

Dean Emeritus of the School of Engineering Aaron J. Miles holds the 30-year medal (left) and the recent 100-year medallion. The 30-year medal was found recently in a box of knickknacks by Mrs. Ben Matthews (wife of a Rolla Policeman) who gave it to Dean Miles.

THE ENVIRONMENT

It is with a special agony that people who love the outdoors see it die a little each year. The wilderness areas, streams, and forests die because not enough people care enough to save them.

Missouri's professional nonpartisan Conservation Department has struggled for years to provide for the needs of all citizens. Almost solely supported by hunting and fishing fees, it has mainly restricted itself to the needs of hunters and fishermen.

No state agency has been directly responsible for people who like to float Missouri's wild rivers. No state agency has been working to preserve Missouri's colorful river bottom lands, its wild prairies, its bogs and swamps. No comprehensive studies have been made of Missouri's record of national leadership in the field

of conservation. No comprehensive studies have been made of Missouri's varied ecosystems.

The Missouri Conservation Department, with its record of national leadership in the field of conservation, is eager to take on these responsibilities. However, dependable, non-political, source of money is needed to begin these long term projects.

Several studies have indicated that a tax on soft drinks is the fairest, most practical, source of revenue. A large statewide committee of concerned citizens has been formed to help publicize the proposed new conservation program.

Requiring a constitutional amendment, this program is being brought before the people by means of a initiative

(Continued Page 8)

Burch To Speak On Pollution

--Elza Burch, corporate manager of preparation, Island Creek Coal Co., will speak at the University of Missouri-Rolla mineral engineering environmental seminar at 4 p.m. Wednesday (September 29) in Mining 107.

He will discuss "Water and Air Pollution Control in Island Creek's Coal Preparation

Plants." The public is invited.

This seminar is part of a series on environmental protection in the mineral industries sponsored by the department of mining, petroleum and geological engineering and supported by the U.S. Environmental Protection Agency.

And Another Thing . . .

By Kent Yoest

The Job Market: Chances For Placement

Despite the optimistic claims of many faculty and administrative personnel on the outlook for the graduating senior job market, facts are indicating that many students are going to encounter difficulties in being placed.

According to the UMR Placement Office, the state of the economy coupled with the university's school calendar is causing a scarcity of openings. This will be responsible for many seniors finding themselves jobless upon graduation.

Companies will be interviewing less this year. At present, about 20 percent of those firms who had scheduled interviews on campus, have cancelled. It is expected that as many as one third of the interviewers will cancel before the semester ends. This compares with a cancellation last year of only 20 percent for the entire semester.

Even without cancellations, the number of employer visits to the campus and the number of interviews given has been decreasing over the last few years. In 1969-70, there were 767 visits, with 12,167 interviews given. Last year, 10,154 were interviewed in 466 visits. With the large number of cancellations, it seems the figures will again decrease, even though the companies who are cancelling the fall interview dates are retaining their

scheduled dates for the spring.

The administration is attempting to paint a rosy picture of the job market. On the September 25 airing of "Missouri Forum" on KOMU television in Columbia, Chancellor Baker made the claim that 98 percent of last year's graduates were placed.

According to actual figures supplied by the Placement Office, at graduation of the fall semester last year, only 80 percent of those students who had sought jobs through the Placement Office were employed. By February, that figure had grown to about 95 percent.

The spring graduates ran into much more difficulty. At graduation, only 75 percent were placed. By mid-July, 10 percent were still searching. Though there is no way to make any type of accurate estimate the Placement Office states, that as of now, "most all have been placed."

It may be true that 98 percent of the class was eventually placed, but there is no known proof of it, and the last accurate figure left 10 percent unemployed.

The seniors need "straight talk" about their chances of finding employment. Though a detailed report of the results of last year's placement activities has been made, the Placement

Office has not wished to make the entire contents of that report known to the Miner, or to anyone else in the student body. Only the aforementioned figures were released to this reporter, leaving the impression that someone does not want the whole job market story known.

What are the seniors to do? The Placement Office insists that there are jobs available, but it is going to take a large amount of work on the part of the individual to find one. It is suggested that each senior begin preparing letters and resumes for companies in which they are interested, and to do so immediately.

An option to the university's placement service has emerged, in the form of Pace, Inc., a private employment service which will begin serving UMR in the near future. But as yet, little is known of this organization or how it operates.

It can be assumed that anyone obtaining assistance through Pace will of course be charged for the service. Whether or not this new firm will be able to guarantee employment, and if the senior will be able to get the guidance and the job he desires, seems as much a mystery to the grad as is the Placement Center's report.

Job Hunting Tips

The one most critical factor in job hunting success is planning and completion of a good personal interview. There are many different factors involved in finding the right job after graduation. Letters, resumes, previous experience, scholastic standing, and technical ability will all play a part in the job negotiation process. However, the impression you create in your first personal contact during the campus interview will, more than any other single factor, determine a continued active interest on the part of the potential employer.

UMR graduates have always enjoyed better-than-average success in their ability to find the right jobs after graduation. This past success is not due to better teaching or better placement services, but has come about through superior effort on the part of each individual graduate. If this record of job success is to continue, it is important for each 1971-72 graduate to exert his or her best efforts in planning and implementing a good job hunting campaign.

Your opportunity for personal contacts through campus interviews will be greatly limited this year due to the continued tight job market. It is, therefore, most important to make each interview opportunity as effective as possible. We hope that the following suggestions will help:

1. **BE PREPARED.** Your decision to interview a specific employer should be the result of careful screening and personal research. Get all possible information about this employer before you interview.

2. **HAVE A DEFINITE TYPE OF WORK TO DISCUSS.** No employer representative will show much interest in a candidate who says "I want a job" or "I'll take any available opening". You may not be entirely positive in your own mind regarding your career goals, but giving the impression of knowing what you want during the interview is the first step in attracting favorable attention from the recruiter. Remember that you do have the right to change your goals and interests as you become more familiar with the job market.

3. **MAINTAIN THE PROPER ATTITUDE AS A JOB APPLICANT.** Always keep uppermost in your mind the fact that it is up to you, as a job applicant, to properly present your qualifications to the prospective employer. Don't fall into the trap of displaying a "show me what you have to offer" attitude, even though there might be a shortage of graduates in your particular field of interest.

4. **REMEMBER THE BASIC PURPOSE OF THE CAMPUS JOB INTERVIEW.** It is a screening interview, both for you and the employer. By a mutual exchange of information both sides determine further interest in discussing employment. Be sure you know what more details you seek to establish lasting interest in the employer's opportunities. Also try to anticipate what further information is needed about you to gain favorable employer interest.

5. **WHAT DOES THE EMPLOYER WANT FROM ME DURING THE INTERVIEW?** Remember that your interview data sheet contains much personal information about you. What the recruiter wants now is a look at your personality, the traits that mark you as an individual. Therefore, you should be prepared to discuss your goals, interests, hobbies, family background, work experience, campus activities, etc. This discussion usually comes early in the campus interview, so that the recruiter can make a decision regarding your suitability for further negotiations. That decision, plus the degree of your interest in him and his organization, will determine what happens during the balance of the interview.

6. **KNOW IN ADVANCE WHAT QUESTIONS YOU WILL ASK DURING THE INTERVIEW.** If you have "done your homework" on this employer before the initial interview, as suggested in Item Number 1, it is sure to be obvious in the questions you pose and the discussions you initiate during your part of the job interview. A display of genuine and sincere interest on your part is the most important factor in building favorable reciprocal interest from the employer.

7. **AVOID "SNOW JOB" TACTICS.** Don't try to sweep the recruiter off his feet with a grand display of superiority, or a false front. Most experienced recruiters can easily detect such action, and will usually terminate the interview in a hurry when they encounter this type of an individual. The familiar advice "Honesty is the best policy" certainly applies to all campus job interviews.

8. **USE A POSITIVE APPROACH IN PRESENTING YOUR QUALIFICATIONS.** Pick out one or two superior points from your special interests that you feel will be particularly attractive to this employer. By subtly emphasizing these in your discussion, you can use a positive approach without being guilty of the "snow job" tactics described above.

9. **DON'T WORRY ABOUT NERVOUSNESS BEFORE OR DURING THE INTERVIEW.** This is a common occurrence which most recruiters expect to encounter, particularly in students without previous interview experience. A good company interviewer will, in breaking the ice at the start, make every effort to put you at ease and establish good rapport. Remember that it is his responsibility and his prerogative to control the entire interview from start to finish.

10. **KNOW THAT THE NEXT STEP WILL BE, WHO WILL TAKE IT, AND WHEN, BEFORE LEAVING THE INTERVIEW.** Your interview will terminate in one of four ways: (a.) Immediate offer of employment. (Possible, but not likely) (b.) Invitation for facilities visit. (Possible if you have aroused sufficient interest.) (c.) Agreement for later contact on basis of further check or submission of additional information. (Most likely to happen) (d.) Flat statement of no further interest in you. (This happens occasionally.) Be sure you know where you stand, and who will take the next step before you leave. If the employer agrees to notify you later, determine how long it will take and where in the employer's organization the advice will come from. Then, if it is necessary for you to follow-up later, you will know where to address your inquiry.

Young Republicans Meet Tomorrow

The College Republicans will hold its first meeting of the year tomorrow, September 30 at 7:00 p.m., room 218 of the Student Union. The C.Y.R.'s are the only political group recognized on campus. Over the coming year the club plans to campaign for local Republican candidates both on the state and local level. Also the club plans to invite candidates running for election and elected officials to speak

before the club at their meeting.

In the spring of the year the club will send representatives to the Missouri intercollegiate student legislature at Jefferson City, Missouri. This meeting is unique in that it involves young republicans and young democrats enrolled in college meeting as senators and representatives in a mock Missouri general assembly. They meet, work, and pass

legislation just as the elected Missouri General Assembly.

Since the C.Y.R.'s are the only political organization on campus, all meetings and especially those with guest speakers are open to any student to attend. Anyone interested in joining, can either attend the meeting September 30 or contact Bill Beck at 364-4023.

Fraternities Announce New Initiates

The Alpha Omega chapter of Sigma Tau Gamma is proud and happy to announce the initiation of two new brothers. They are Richard Kopp from Fenton, Mo., and Robert Stanley from Clio, Iowa. They pledged during the spring of 1971, with Rich majoring in Mechanical Engr. and Bob in Civil. A dinner was held in their honor after the formal initiation September 2, and the faculty advisor Prof. Richard H. Kerr attended it and gave a most inspirational talk. The initiations brought their total house membership up to 59 men.

The brothers of Delta Sigma Phi Fraternity are happy to announce the initiation of four new members into their brotherhood. The initiates were Bruce Baker from Webb City, Mo., Charlie Koch from St. Louis, Mo., Keith Nolde from St. Louis, Mo., and Bob Yoder from St. Louis, Mo. The initiation ceremonies took place the weekend of the 17th, followed by church services at the First Methodist Church.

The members of Pi Kappa Alpha Fraternity take great pleasure in announcing the initiation of five new members to its chapter. They are John Hohenberger, a petroleum major from St. Louis, Elmer Schneider, an ME major from St. Peters, Mo., Bruce Lurtz, a Civil major from O'Fallon, Mo., Phillip Weddle and Michael Morell, both Civil majors from St. Louis, Mo. and Mattoon, Ill. respectively.

Finally, the brothers of the Beta Chi chapter of the Kappa Sigma Fraternity take great pride in announcing the initiation of Jack Costello into their brotherhood. Jack, an ME major and a 1970 graduate of St. Louis U. High from Glendale, Mo., was formally initiated Monday night, September 13th.

ENVIRONMENT

referendum petition. More than 150,000 signatures will be required.

If the proposed amendment is successful, more than twenty million dollars will be made available for a wide variety of recreational and educational programs benefiting all citizens.

Citizens United to Restore the Environment will have a table on campus this fall with a copy of the petition for all interested people to sign. Anyone interested in more information about this amendment can call Al Visintainer at 364-8602.

MISSOURI MINER SPORTS

RICK REMLEY, SPORTS EDITOR

Joshua Plunges For Two TD's

Big Plays, Mistakes Sink Miners

The Miners season record dipped to 0-2 as they dropped their home opener to the Vikings of Missouri Valley by a score of 27-21. The contest was a see-saw affair decided only in the last two minutes as quarterback-safety Bruce Ayers intercepted an ill-advised Godwin pass to allow the Vikes to run out the clock.

The clinching touchdown was set up on an 86 yard kickoff return by Tony Chandler, which gave the Vikings a first and ten on the Miner eleven. The Golden Horde, in their most sensational stand of the game held eight times from inside the ten yard line before finally giving up what proved to be the deciding score. The touchdown came on a one yard touchdown pass from Balazik to clutch receiver Jim Roskelly. Roskelly beat halfback Kim Coletor on a down and out pattern on the fourth down play.

The first half saw the Mo Val squad enjoy a wide edge in play as they totaled 213 offensive yards to the Miners 137. The Miners tried to grind out the yardage, using their big running back primarily inside the tackles. When forced to the air, they favored the short swing pass to the back. Godwin completed 2 of 5, one an eight yarder to Mike Joshua, who may have won a starting berth as he cracked over from two of the three Miner TD's.

The Miners lone first half TD came after an 80 yard drive on 11 plays, including 37 yards and the scoring play by Joshua.

The Vikings scored twice in the first half, once on a 34 yard reverse to Roskelley, who raced around the left side of the confused Miner defense for the score.

The reverse was the culmination of a drive begun on their own 20 yard line, which took only seven plays, including an 18 yard gallop by Larry Henderson.

The other Viking touchdown came early in the second quarter, immediately after the Miners squandered their best scoring chance of the night. The Miners had a second and two on the Vikes' 16, but came away empty-handed. Kubiak lost 3 yards on the second down play,

leaving a clutch third and five situation. Kubiak gained just 1 yard, and it was fourth and four. John Key came in to attempt a field goal, but a delay of the game penalty set the ball back to the 23 yard line. Godwin went back to pass, and had Steve McVeigh open for the first down, but was downed by a powerful rush before he could release the ball.

The Vikings took the ball and drove 85 yards for their score. The big play in the drive was a 29 yard draw to Hamill, when the Golden Horde had the Mo Val offense bottled up third and 15 on the Rolla 47.

On the next play, Ayars tossed a 42 yard bomb to Roskelly, setting up a first and goal from the five. Chandler scored three plays later.

The score at halftime was 4-7 in favor of Missouri Valley.

The Miners opened the second half in the air, throwing 20 times, as compared to only 5 in the first half. An intercepted pass stalled a Miner drive off the opening kickoff.

The Vikings launched a 62 yard scoring sortie with about 7 minutes left in the third quarter. The drive was kept alive by three clutch third down plays. Hamill caught a 13 yard pass on third and two from the Valley 46, then in one of the big plays of the game Ayars tossed a 26 yard pass to Roskelly to get out of a third and twelve hole. Roskelly caught another 26 yarder on third and 28 to set up the TD Balazik to Roskelly for 5 yards. The score came on a down and out over No 32, Kim Colter with 51 seconds left in the quarter.

The Miners came back with a 74 yard drive in which Godwin completed three of three. After a pass interference call set up a first and goal, Joshua scored from the four.

On the ensuing kickoff, Chandler romped for 86 yards, setting up the winning TD, after the Golden Horde nine play goal line stand.

The Miners, down 27-14, battled back with another score, Godwin to Sommerville to make it 27-21. The seven yard pass play came with 6:18 left.

The defense held for three plays, and forced a punt with 4:26 left. The offense began a desperation drive from their own 32. Sparked by two Godwin and Sommerville passes of 14 and 15 yards, the Miners had a second and two from the Viking 27. Godwin rolled right, and tossed back across the field to Tim Holcer. Bruce Ayers

stepped in front of Holcer, for an interception and a 14 yard runback. It appeared that Godwin could have run for the first down, and perhaps a substantial gain, as there was 2:08 left in the game, but he tossed the interception which proved the end of the game, as the Vikings just ran out the clock.

Martin Weekley (83) leads the blocking as Miner fullback Steve Kubiach (23) sweeps the left end.

Miners Host Culver-Stockton; Both Teams Look For First Win

This Saturday the Miners will attempt to improve their 0-2 record as they host the Culver-Stockton College Wildcats.

Culver-Stockton is located in Canton, Missouri and has an enrollment of only 700. Even with this small student body, the Wildcats have built up a reputation for good football. Coach Jack McBride has compiled a 23-12-6 record in his four years at Culver-Stockton. Last season the Wildcats ended the year at 6-3 and finished behind Missouri Valley in the MCAU conference race.

Coach McBride has lost only 10 lettermen from last year's squad and has 21 lettermen returning. There are, however, several key positions which are being filled by relatively inexperienced freshmen and sophomores.

The Wildcats have returning lettermen at every offensive position except split end. Bill Exham, an all-MCAU selection last year at split end, injured his knee in pre-season scrimmage and will not see action this Saturday.

The interior of the Wildcat line averages 223 pounds. Coach McBride thinks his line is quick enough to overcome the weight disadvantage with the Miners.

The Culver-Stockton speed has been hampered by rainy conditions in the first games of the season.

In the defensive line, the Wildcats lack depth and experience. The Culver-Stockton coaching staff has attempted to bolster the defense with junior college transfers and sophomores. The defensive line averages only 207, but McBride again hopes quickness will help make up for the weight advantage the Miners will have Saturday.

The lack of depth in the Wildcat ranks can be shown by the fact that two men play both offense and defense. Senior Millard Bondurant gets in on the aerial action on both sides of scrimmage. Bondurant doubles as a flanker back and defensive halfback. Junior Darrell Bodie from Gary, Indiana, plays tackle on both Wildcat Platoons.

The Wildcats opened their season on September 4 when they lost to Northern Iowa College 12-7. They came back the next week and ended up on

Lambda Sig Takes

Early Lead In

Girl's Intramurals

Lambda Sigma has jumped to an early lead in the girls intramural race. Lambda Sig has taken first place in all three of the sports the girls have participated in thus far.

In badminton doubles, Sue Jaggi and Winnette Mason took first place. In the singles competition, Magge Corrigan of T.J. took top honors, followed by Gayle Druand of Lambda Sig.

Lambda Sigma also took the top two positions in the singles tennis tourney. Sue Jaggi defeated teammate Linda Wallard for the championship.

Although the enthusiasm for the golf competition was a bit on the weak side, Coach Van Nostrand went ahead and recognized Laura Davenport and Cheri Hardwick of Lambda Sig as the winners. The only other team to enter the competition was T.J., represented by Doe Ann Crocker and Debbie Roubidoux.

Total point standings including tennis, badminton, and golf are as follows:

| | |
|---------------------|-------|
| 1. Lambda Sigma | 36.00 |
| 2. Thomas Jefferson | 30.00 |
| 3. Wesley | 10.00 |
| 4. Rolla 1 | 5.00 |
| 5. WRHA | 3.00 |

Running back Les Clark, last year's leading ground gainer is brought down from behind by DHB Stanley Jones.

Mural Roundup

By Pete Pixum

PETE

Overheard at a Cottey mixer: "Well, experience is the best teacher." Pete found the old adage to be quite correct in another context, as 87.5 percent of my predictions were correct. In my second week of forecasting. That first week of "experience" certainly helped. The overall average now stands at 69 percent. If you can't break 80 percent, I guess 69 is the second best choice. (Note: Nothing about 69 being best second choice was overheard at any mixer.)

In response to numerous requests (my mother's) a picture of Pete, minus my famous "pistol" will appear in living black and white in this week's Miner. Keep those cards and letters trickling in, fans! Pete and his pet boy, Clyde,

will be up at the office Thursday to personally autograph these treasured mementos, and plug my new pamphlet, "Saga of a Soggy Soothsayer; How I Rode My 1932 Olivetti Underwood to Fame and Fortune in Just a Few Short Years."

This week's Game of the Week, undefeated TEKE vs. Delta Tau, in the game that could clinch the league title for TEKE. TEKE must stop Delta Tau's scrambling QB. We think they will. TEKE over the Dels.

Things to look for: Women's Mural Predictions, Basketball picks, four-leaf clovers, and Zane's redneck apparati.

Wednesday night

TJ over Engine
KA over Theta Xi
TEKE over Mates
59ers over Shamrock

Thursday night

Phi Kap over Pikers
Lambda Chi over Campus
Kappa Sig over A. Phi A
Sig Pi over Beta Sig

Friday Night

Acacia over Engine
TEKE over Delta Tau

Monday night

KA over Theta Chi
Triangle over MRHA
Delta Sig over Sig NU
Lambda Chi over Sig Pi

Tuesday night

Kappa Sig over Shamrock
Phi Kap over Tech Club
Sig Tau over Sig Ep
Pi Kappa Phi over Liahona

Football Leagues Shaping Up; Eight Teams Still Undefeated

Intramural Football is going into its fourth week with leaders in each league immersing. Sig Pi and Lambda Chi have to find somebody to beat TEKE if they are going to make a bid for the championship. A. Phi A. and Kappa Sig do battle this to decide the leader in their division. Phi Kap and Pi K.A. are both undefeated, but Phi Kap has won four times and Pi K.A. only twice. Delta Sig has a slim lead over Sig Nu and Sig Tau in a tight contest. Inclement weather postponed all of Monday night's games.

Tuesday Alpha Phi won their third straight game by defeating Engineers, 33-0. Gary Thurman ran a punt back 70-yards and threw a TD pass to Robert Morrison. On another 70-yard play, Sam Brown scored on an end-around for A. P. A. Engine Club is 0-3. A. E. Pi edged Liahona, 13-7 on a 50-yard touchdown pass from Barry Bergman to Gary Beitch. A short run by Dave Rushing wrapped it up for A. E. Pi. The win makes A. E. Pi 2-0, while Liahona has lost both their games. Prospectors won their first game of the year by defeating Kappa Alpha, 19-13. Doug Campbell threw two TD

passes: A 40-yarder to Brian Carmier and a 20-yarder to Ron Parker. A 5-yard sweep by Ralph Drews rounded out Prospector's scoring. K.A. is now 0-3. Wesley beat Pi Kappa Phi, 20-13.

Wednesday TEKE won their third consecutive game in a close one over Beta Sig, 21-13. Three short passes from Randy Lang Accounted for TEKE's scoring. Lang and Tim Spiek connected for 15 yards and Dennis Mier nabbed one for the second score. Another pass late in the game to Mier clinched the win. Beta Sig's record is now 1-1.

Pi K.A. continued their winning ways by defeating Kappa Alpha, 21-19. Scoring passes from Dennis Miera to Steve Beiderman, Mark Smith, and Terry Hill gave the Pikers their second victory. K.A. is now 0-3.

The game of the week was Sigma Pi's last second win over Delta Tau Delta, 22-20. A Kent Vance pass to Mike Jones with ten seconds remaining gave Sig Pi their third win against one loss. A short pass to Ernie Cagle and a quick pitch to Dave Larcker scored the other TD's. A safety proved to be the

winning margin. Delta Tau is now 1-2. Sigma Tau defeated Triangle, 6-6 in overtime.

Tech Club recorded their second win of the season Thursday by defeating Theta Chi, 35-0. Larry Foster had a hand in all the scoring as he threw three TD Passes to Tom Kiesser and on to Fred Forck. Foster also scored on a nine-yard run on the first play of the game. Theta Chi is 0-3. Phi Kappa Theta extended their winning streak to four games by defeating Theta Xi, 33-7. Larry Kruse threw Three TD passes to Dave Rinas and scored on a sneak from one yard out. Ron Bigarri ran two pass interceptions back for Phi Kap. contention for the league lead by trouncing Acacia, 61-7. QB Dave Krueger tossed four touchdown passes; two to Pat Knoll and Stewart Scott. Chuck Ferry and Steve Sherrick each ran back interceptions for Kap Sig. Acacia is 1-1. Sigma Nu won their third game by blanking M. R.H.A., 13-0. Finley Peasley scored on a 25-yard run and he threw a 35-yard TD pass to Jack Greenley. The Dorms are 0-4. Lambda Chi handed Mates their fourth loss with a 12-0 victory.

Mizzou Bounces Ruggers; Rookies Win Muddy Battle

The UMR rugby team took a few bad breaks as they dropped a 16-13 decision to the University of Missouri here last Saturday. The game was played under less than favorable conditions as it rained for almost the full duration of the game.

The first half of play was almost a standstill as neither team could move the ball very well on the slippery field. The team from Missouri though, was able to score two tries and made both of their conversions also. This made the score 12-0 at the half.

The second half proved to be more exciting as both teams seemed to be able to move the ball better. Five minutes into the second half UMR got on the scoreboard as Jim Weber scored a try. Terry Miller kicked the conversion to add two more points to the Miners score. This made the score 12-6, Missouri. UMR closed the gap even more when 10 minutes into the half Carl Shanke picked up a fumble and ran 50 Yards for another UMR score. The conversion was missed and this made the score 12-10, Missouri. The Miners finally got another break when with 6 minutes left in the game Pete Belesha took a kick on the 50 yard line and ran it back to the 30 where he then kicked a field goal. This made the score 13-12 in favor of UMR.

The game was almost a stalemate for the rest of its remaining time. When time for the game ran out Missouri was in the middle of a play. The referees blew the whistle to stop play and most of the players stopped for the whistle. There is a rule in rugby though that the game isn't over until the ball is dead, so the Missouri player with the ball ran across the goal line for a try to win the game for Missouri, 16-13.

In the second game of the afternoon UMR saw better times as they won by a score 10-6. The second game was the Golds game and the teams were made up of mostly the new players on both teams.

In the first half there was only one score as Joe Kappa of UMR fell on the ball in the end zone to score a try. Dan Debolt kicked the conversion to make the score 6-0. Missouri retaliated in the second half as they scored a try and made the conversion also. The play in the second game was fairly good considering most of the players were new to the game. The last score of the game came when Tom Drennen scored the final try for UMR. The conversion was missed to make the final score 10-6 in favor of UMR.

The rugby teams next game will be October 2 against Warrensburg, at Warrensburg.

Members of the UMR Blacks Scramble for a loose ball. The miners lost the game 16-13.

Harmon Highlights

Only one of the Top Twenty really stumbled hard last week in a couple of there games where members of the select group met head to head, there had to be a couple of losers. And we were fortunate..we called them both. The Colorado sky-rockets went blazing back to Boulder and Auburn is on that Southeast Conference title track.

So.. our list of the twenty best reads a little different than it did seven days ago. Michigan has taken over as our new number one team after humiliating U.C.L.A. last Saturday. Texas moved into the Number 2 slot just a fraction ahead of Nebraska while Notre Dame dropped from first to fourth after almost stubbing its collective toes over upset-minded Purdue.

In a real toughie for a member of what we call our "almost" group (one third ten),

un-ranked and undefeated Duke runs into Stanford, rated 8th. The Indians have whopped three opponents very decisively, and they may not find things quite so easy against the Blue Devils. However, Stanford is still the favorite by 14 points.

The largest winning streak among the nation's major colleges goes on the line Saturday as Toledo, unbeaten in 26 straight games, takes on Ohio University in a Mid-American conference scrap. Villanova came within three points two weeks ago, and Ohio U. is no soft touch. Toledo will win Number 27 by 11 points.

Another member of our "almost-in" group is involved in a rivalry that goes back 60 years. The Tar Heels of North Carolina tangle with the North Carolina State Wolfpack. North Carolina has won 40 of those games, and the crystal ball says

it will be another Tar Heel victory, this one by 31 points.

Florida State, undefeated and un-ranked (but close), squares off against Virginia Tech. The Seminoles gained considerable stature with their convincing win over Kansas last Saturday, and are favored to ship V.I.P. by eighteen points.

And our new number 1 team, Michigan, will be a partner to the biggest mis-match on the schedule this week. The Wolverines are favored over hapless Navy by 56 points.

Elite meets Elite again this week as Alabama, ranked 6th, traded niceties with Mississippi, and 9th-rated Oklahoma plays Southern California, ranked 16th. Favorites: the Crimson Tide by 12 points over the Rebels, and the Sooners by just five points over the Trojans.
